Fiat Chrysler Automobiles Expands Coronavirus-related Relief Actions; 1 Million Meals for School Children Included in New Programs

March 27, 2020, Auburn Hills, Mich. - As previously communicated to the company's employees from Fiat Chrysler Automobiles (FCA) CEO Mike Manley, the company is in the process of converting its first plant to produce [face masks for donation](#) to first responders and health care workers. The first machinery has been delivered and installed with supply and donation coming on stream in the coming weeks.

FCA is expanding its program of measures to support coronavirus relief efforts, focused on two principal areas: charities providing food services to children and support for a range of technical, logistical and manufacturing programs, such as face mask production.

"There has never been a more important moment to help children and their families with vital needs in our communities than during this time of great uncertainty," said FCA CEO Mike Manley.

Food programs for children in our communities

FCA will work in partnership with non-profit organizations and foundations that are providing food to children until schools return to session. Starting immediately, FCA will help provide more than 1 million meals to school-age children in the communities around our principal manufacturing plants in Illinois, Indiana, Michigan and Ohio. The program will then be extended nationwide in the U.S. and to Canada and Mexico, supporting similar relief efforts for kids who would normally access school meal services.

Mobilizing company resources

Following the first actions taken to start face mask production, the company is now investing technical, logistical and manufacturing resources at medical equipment and personal protective equipment (PPE). With the donation of face masks produced by the company starting in the coming weeks, the company will invest to extend that production capacity to other plants and ultimately donate masks to first responders and health care workers across the world. Drawing on experience from the company's engineering and logistics team in Italy who are assisting a local ventilator manufacturer, FCA is engaged with other companies producing ventilators and other much needed medical equipment and PPE.

"In this time of need, we've focused our resources on those actions we can implement quickly and that will have the greatest impact, as we did in Italy as soon as the emergency started," added Manley.

FCA

Fiat Chrysler Automobiles (FCA) is a global automaker that designs, engineers, manufactures and sells vehicles in a portfolio of exciting brands, including Abarth, Alfa Romeo, Chrysler, Dodge, Fiat, Fiat Professional, Jeep®, Lancia, Ram and Maserati. It also sells parts and services under the Mopar name and operates in the components and production systems sectors under the Comau and Teksid brands.
